

To Whom it May Concern

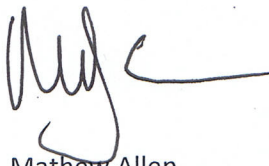

Neo Infrastructure (AUST) P/L has undertaken several contracts for the City of Marion since the company's inception of early 2010.

Neo have demonstrated that they are capable of delivering the more complex projects with a no fuss attitude that certainly instils confidence in their ability. The professionalism and open and honest communication exhibited by the management team compliments their work ethics and ensures there are no assumptions.

Neo have shown that they are capable of successfully managing not just the construction of the project but the public relations side of some of the more sensitive scopes. The demonstrated, collaborative approach to getting the job done is an inherent quality that will see the organisation grow into a company of choice.

I would have no hesitation in recommending Neo to any potential client and wish the company well through its imminent growth phase.

Yours faithfully,

Mathew Allen  
Manager Infrastructure  
City of Marion
